Meaning of the Columns and Abbreviations:

The waste types are assigned to the positive list, negative list or the categories "limited positive" or "conditionally positive" by means of marking with a cross or certain letters. Whereby:

Limited positive: Means acceptance is possible if special conditions are observed (see below)

Conditionally positive: Means that this waste may be incinerated only if contaminated with substances from the positive list and the contamination reaches a degree that another form of CPB or other disposal is ruled out.

E: Individual case decision upon application to RP Darmstadt

P: The group is to be completely assigned to the positive list provided that the wastes come from a special waste small quantities collection, otherwise the assignments made apply.

G: These wastes may be incinerated provided that the technical and organisational conditions for this are in place.

K: Incineration allows with storage in cooling tank, etc.

T: According to an order from RP Darmstadt of 21.03.2000, the amount of PCBs in the solids sent for incineration must not exceed 10 % by weight

N: Without multiply nitrified organic chemicals

Q: May not be used for the absorption of Hg

Blanket negative:

- Substances that can lead to damage to the plant (corrosion, blockage)
- Substances with ignition temperatures below 135 °C, such as CS₂
- Substances that can lead to dangerous reactions when stored with other substances
- Radioactive wastes
- Substances that are spontaneously inflammable at 350 K or below
