

Self-registration at a glance

1. Follow the signs to the right car park: short or long trucks.
2. Go to check-in and register yourself. The terminal will tell you if you need to go to the reception for your registration.
3. Wait until your license plate appears on the screen.
4. Drive onto the weighbridge and scan the QR code on your arrival ticket.
5. Follow the route shown on the screen to your unloading or loading location.
6. Drive to the weighbridge at the exit, scan your QR code and don't forget your transport documents.

How do I register and weigh my load?

1 Follow the signs to the right car park: Car park 1: short trucks, Car park 2: long trucks

- Park in the parking bays provided.
- Go to check-in. It is located right next to the car park.

2 Register at check-in

Keep your registration reference ready.

Your registration reference always starts with a “2” and consists of eight numbers (quotation) and two or three serial numbers (position) for example: 20045678/20.

Without the full registration reference, you cannot register, so you need to get it from your employer!

Please scan your provided QR-code or enter your delivery reference:

2..		/	
1	2	3	× Cancel
4	5	6	↩ Edit
7	8	9	■ Clear
0			✓ Enter

- Fill in your registration reference and select your order if necessary.
The terminal shows whether you can register yourself or if you need to go to reception.
- Fill in your license plate, customer reference or Fost Plus reference and the number of passengers.
- Watch the safety instructions.
- Take your arrival ticket with the QR code, which you need to weigh-in.

3 Wait in your vehicle until your license plate appears on the screen

Drive to WEIGHBRIDGE IN 1 (short trucks) or WEIGHBRIDGE IN 2 (long trucks).

Car park 1 (small trucks): take care when driving out of the car park. You do not have priority!

4 Drive onto the weighbridge and scan the QR code on your arrival ticket

- You can scan the QR code on your arrival ticket here. If that doesn't work, enter the PIN shown above the QR code.
- Confirm the details of your task and the weight.
- You will now see the safety instructions and the route to follow displayed on the screen.

5 Follow the route shown on the screen to your unloading or loading location

where an operator will be able to help you further.

Caution: internal traffic (wheel loaders, fork-lift trucks) may drive against the direction of traffic.

6 After loading or unloading, drive to the WEIGHBRIDGE OUT at the exit, scan your QR code and don't forget your transport documents

- Once you've finished on site, drive to the WEIGHBRIDGE OUT at the exit. This is the same for all trucks driving out.
- Scan the QR code again or enter the PIN.
- Confirm your weight.
- Take your weigh ticket and drive off the weighbridge.
- What about your transport documents?
 - Do you use an e-CMR? You can sign this off with the QR code that appears on the weigh terminal. Afterwards you can leave the site.
 - Do you use paper transport documents? After weighing-out, park in the parking bays provided and get your papers signed at the reception. Have your papers been signed? Go back to your truck and leave the site.

Thank you for your visit!
